

ReleaseProcess19DR4

Release 1.9 DR 4

Release April 7th 2005

Patches

[-]

- Calendar on a new database doesn't work. The columns are missing in the db creation from scratch. You can enter the 2 queries following or run tiki_1.8to1_9.sql script

```
ALTER TABLE `tiki_calendar_items` ADD `nId` INT( 12 ) DEFAULT '0' NOT NULL AFTER `categoryId` ;  
ALTER TABLE `tiki_calendars` ADD `customsubscription` ENUM('n','y') DEFAULT 'n' NOT NULL AFTER `customparticipants` ;
```

License Issues Resolved

[-]

- BlueMetal moved to mods.tiki.org [Damian](#)
- GreenMetal moved to mods.tiki.org [Damian](#)
- RedMetal moved to mods.tiki.org [Damian](#)
- PurpleMetal moved to mods.tiki.org [Damian](#)

- new option to force to go in group homepage not only from the default homepage [sylvie](#)

- csv import for group calendar

Enhancements

[-]

- now use the Admin->Menu based application menu rather than the .tpl [Damian](#)
- a module can be displayed only for some languages [sylvie](#)
- TikiMaps: Can handle non square maps tna
- Simple style updated [luci](#)
- added direct link to display poll's comments [luci](#)
- a message is sent if the page doesn't exist in a mailin wiki-get [sylvie](#)
- check the mailin pop3 account before saving it in the database [sylvie](#)
- img in wiki syntax can have a alt parameter [sylvie](#)
- forum post area displays quicktags if wiki syntax allowed [sylvie](#)
- mod_articles param topic=topic_name [sylvie](#)
- user pref page title shows the username [sylvie](#)
- register subject in a template [sylvie](#)
- HTML comments either removed or changed to smarty ones [Damian](#)
(preserves bandwidth, they do mount up!)
- Updates to English British language file [Damian](#)
(better wording on tips)
- enhanced the quick_edit module with 3 parameters : module_title, categid, submit, size, heading and templateid [mose](#)
- added optional taking in account of a categid param in editpage [mose](#)
- improved article plugin : it takes the Id of last article when no Id is given [mose](#)
- Additional parameter to last_modif_page module: minor=y to see minor changes [sylvie](#)
- Added optional sort order in image galleries, as well as sub-galleries redflo
- New optional "side-by-side" diff report style that resembles Wikipedia's diff style (terence)(sylvie)
- Different styles added in Wiki history + diff between arbitrary versions [sylvie](#)
- Tidy up some waste code in tikilib.php [Damian](#)
- a mail-in pop3 account must be valid before been saved [sylvie](#)
- PluginModule's np parameter defaults to 1 (enable). Existing uses of PluginModule without np set should see the output change, but it's unlikely that this will have undesired effects. [sylvie](#)
- can choice email enf of line CRLF / LF [sylvie](#)
- implemented the sticky tracker item : if a fieldname is page, it is used as a filter on trackerlist wikiplugin and automatically fed in tracker wikiplugin [mose](#)
- new (experimental) referral search functionality, see [SearchDev](#) - mdavey
- [Patch#1093839](#) Wiki says "page not found" if query string is "?page=" mdavey
- styles transitions: support for older stylesheets on v1.9
- modules can be [shaded](#) or have their [decorations suppressed](#) - mdavey
- plugin [PluginTitlesearch](#): additional parameter style=>list for reducing the output to a comma separated list [ohertel](#)
- module [mod-last_articles](#): additional parameters for filtering articles [ohertel](#)
- initial work for [RFE#918526](#) Search wiki page name module should use real search mdavey
- [RFE#828048](#) Wiki : Add a "View Source" option mdavey
- Fancy TOC mdavey
- DIV plugin got ability to float left or right [luci](#)

- enhanced ((page|desc)) syntax: ((page|)) (no characters after |) will yield "page: page's description" [terence](#)
- image galleries batch upload from directory: switch for "create sub galleries from sub directory names", means: when uploading images dirname/*.jpg, the images may go to a sub gallery 'dirname'. preferences for the new galleries are taken from the parent gallery [ohertel](#)
- image galleries batch upload from directory: switch for "remove file extension" from image name in 'name field' [ohertel](#)
- image galleries batch upload from directory: switch for "use sub dir name as file description" [ohertel](#)
- image galleries batch upload from directory: works on subdirectories now [ohertel](#)
- image galleries: image popup windows have "slideshow" buttons now (back and forward) [ohertel](#)

New CSS Classes

[-]

- **wiki diff styles** : .diff, .diffheader, .diffbody, .diffdeleted, .diffadded, .diffchar
- **site identity styles** : .sitelocbar, .sitenavbar, .sitelogo, .sitead, .sitesearchbar, .description, .crumblink
- **admin remarks box styles** : .rbox, .rbox-title, .rbox-data, .rbox-title[name="warning"], .rbox-title[name="note"], .rbox-title[name="tip"], .rbox-title[name="comment"], .rbox-data[name="warning"], .rbox-data[name="note"], .rbox-data[name="tip"], .rbox-data[name="comment"] - *will eventually be used for a wiki plugin, too.*
- **(module) box styles** : table.box-title, span.box-titletext, a.flipmodtitle, img.flipmodimage, div.box-data now has unique id also.
- **a.tikihelp** : new attribute: *vertical-align: text-top;*
- **{toc}** : .fancytoclevel

Partial.

[-]
