What

See [Webinars](#) for a detailed description.

Bug fixing session

Regression confirmed and reproduced (instance)

- [Wrong error message on Group creation](#) - fixed by jonny
- [Unassigning several users from a group fail](#) - fixed by asa
- [Tracker field creation failed as special characters are omitted \(and not replaced as previously\)](#) - fixed by asa
- [Menu top item that have sub item are not clickable anymore](#) - closed
- [Menu level are not working](#)
- [WYSIWYG table editor is broken \(If are converted into 3 "%"\)](#)

Other Regression

- [Missing fields in tracker plugin templates](#)
- [Draw \(SVG-edit\) feature "no route found"](#) - Works OK in the show instance (http://chibaguy-342-6504.show.tiki.org/tiki-index.php?page=PluginDraw_test) so my problem must have been a local glitch. I'll update the bug report.
- [Not possible to create a survey anymore](#) - closed
- [I can't change a field of type "attachment" to any other kind of field.](#) - fixed by asa

Regression that may require more than a bug fixing

- [Drag & Drop zone for uploading an image changed to text field ?](#) - this is inside eFinder, and probably an UX choice and not a bug. Probably not being handled before 18.0 release.

Where

<http://live.tiki.org>

Topics

1st hour quick news

1. Fosdem last news

Second hour, longer topics

1. Tiki 18 Release

Recording
