Welcome to TikiTV

Here you will find short movies made by the Tiki community. They are quick and raw, so don't expect too much editing and computer generated graphics! However, you get to see some of the people in the community talking about their work directly.

Lots of incredible people have contributed to Tiki - they are the power house that makes it so useful for so many. We hope TikiTV will provide an opportunity for those who build **and** those who use Tiki, to share there interests, issues and achievements.

Please, it is the Tiki way, TikiTV invites you to add your own videos. Just click the edit icon and add a link to the list!

We have 4 channels, you are welcome to contribute to any of them. **Please feel free to edit this page!**

Channel 1 - The news channel

BigBlueButton integration

Fred Dixon and Marc Laporte about BigBlueButton

Meet Fred Dixon from Blind Side Networks, a company dedicated to helping universities, colleges and commercial companies deliver a high quality learning experience to remote students and Marc Laporte of Tiki Wiki CMS Groupware. Together, they talk about why the two fit together well

About Blindside Networks

Blindside Networks is a company dedicated to helping universities, colleges, and commercial companies deliver a high-quality learning experience to remote students.

They do this by providing commercial support for BigBlueButton, an open source web conferencing system for distance education.
