

Tiki Roundtable Meeting 2021 07

Tiki Roundtable Meeting 2021 07

Author: Bernard Sfez / Tiki Specialist - 14 Jul 2021 14:51 GMT-0000

On the 15th of July 2021 at 14:00UTC we will have our monthly community meeting.

Below are some of the topics of our two-hour meeting that you can join in at : <https://live.tiki.org>.  
Short discussions

- New way to populate TRM topics
- Status of Tiki 23 release process
- Status of TikiFest Virtual 2021 Summer Workshops
- "Site closed" message translation dilemma
- Improve setup.sh php version detection
- Menu option for Wizards integration in our new admin dashboard
- Gitlab questions and answers

Longer discussions

- How to develop the new Admin Dashboard
- Status of Tiki Community 2021 Navigation Revamp (*15 to 20 minutes* if we have time to present the work done)

More details at : <https://tiki.org/Roundtable-Meeting-2021-07>.

We had our Monthly meeting yesterday (15/07/2021)

The recording of the discussion is there : <https://tiki.org/Roundtable-Meeting-2021-07>

People are invited to vote for the next meeting schedule and to participate to organise the next TRM (add your name as facilitator) here : <https://tiki.org/Roundtable-Meeting-2021-08>

This is a short summary of things discussed.

(please keep in mind that this is a quick summary from my mind, feel free to add and adjust information)

- We discussed the way we prepare our TRM
  - Bsfez volunteered to coordinate, advertise and organise them as official task till the end of the year
  - Various dates and times will be proposed to allow more and different people to join
  - Everyone is invited to propose topics and help to prepare meetings (during the meeting preparation time)
  - When there is no enough topics proposed by volunteers they will be picked from Tiki medias (forums, pages, devlist, etc)
- Status on Tiki 23 release process
  - Tiki23 was branched successfully and look pretty solid
  - Due to awesome and good (big) stuff we branched a month later
  - Due to next server issue we couldn't test and now we can keep the process moving forward (Alpha?, Beta)
  - More work and task before the final release are to be planned
  - Users are welcomed to test and reports Tiki23
  - Gary mentioned that the SmartMenu addition is working fine

- Status on TikiFest Virtual 2021 Summer Workshops
  - Not enough interest/request and previous volunteers didn't come back on this event
  - The event is "cancelled" for now (may be someone will plan another day)
  
- Site closed translation dilemma
  - We should have a better way to manage (not through URL parameters) and edit (one language) text string on the page when everything else is down (no php)
  - We have a ticket about this and more information will be put there
  - Jonny mentioned that Wordpress has an original solution about this and Bernard will check (as well as other options) and report it in the ticket
  
- Improve setup.sh php version detection
  - As the initiator of the question wasn't with us we tried to figure and review a bit the feature
  - Most of the people are ok with the way it is working (it is a dev tool)
  
- Menu option for Wizards integration in our new admin dashboard
  - Jonny completed the integration into Tiki23 new admin menu
  
- Gitlab questions and answers
  - Failure on pipeline was discussed (people reported it is broken now)
  - Various test are performed and it is quit hard to understand what is critical and is not for common people
  - While it is important to have them working and preventing Tiki to break merge request can be done
  - Ricardo's team implemented and seems to be in charge of this and with new addition (PR12) there are waves
  
- How to develop the new Admin Dashboard?
  - Everybody seems to agree this is a great improvement (during the TRM and different occasion)
  - There is a profile to install dashboard "plugins" (created from scratch by Jonny) and Xavi raised a issue about profile install return page
  - While some setting were done without real discussion, we agreed the new Admin should be optional but enable by default (eventually a message/warning) will allow people to get back to legacy quickly
  - Jonny profile was done in a rush and need to be improved (communication, update, ...), people are invited to try and give their recipes
  - We saw that the dashboard is nicely integrated with Module (Admin) and fully customisable using existing Tiki tools
  - We need an improvement so modules of features that are not used are not displayed (default dashboard)
  - We have now (thanks Jonny) a plugin list module so we can virtually use any information from the Unified Index
  - The name of "things" was discussed (as well as breaking all Admin documentation page) ;-)
  
- Status on Tiki Community 2021 Navigation Revamp
  - Gary and Bernard presented the actual work done by the Navigation revamp team (with Aris, Carsten and Marc)
  - People seems to like it and encouraged the implementation: 1 main top menu, 1 topbar menu per section (dev, doc, etc), a main content in the page (loaded visible screen)
  - As the main ideas/principles have been discussed, Gary and Bernard have to set it (naming,

prioritising important links by placement, etc)

Have nice week end,  
Bernard
