Volunteering Facilitator: [Bernard Sfez / Tiki Specialist](#)

When

[Thursday, April 21, 2016 at 18:00:00 UTC time](#) (click for time zone in your city)

What

See [Roundtable Meetings](#) for a detailed description.

Where

<http://live.tiki.org>

Topics

1st hour quick news

- Tiki 15 release status

Probably will try and remove the dependency on php-intl (as emailed)

- My opinion: The intl extension can be a blocker for Tiki upgrades. In my case, with shared hosting, it was possible but required an account upgrade (another account was luckily on a newer server so already had the intl extension). (I may not make it to the roundtable so wanted to add my opinion here.
- Fix committed in 15.x in **r58399** please test and we can discuss if it changes plans for the 15.0 release

- New goodies planned for Tiki 16

- Min spec:
 - PHP-- 7+?-- too radical min spec php 5.6
 - Update Smarty (was stuck slightly out of date for 15.x)
- [H5P](#)
- Plugin editor revamp
- Removal of other jquery-ui dependencies
- Stuff that missed the boat from [here](#) for Tiki 15

- Bootstrap 4 is at alpha.2 so may not be in time for Tiki 16, but is something to keep on the radar.
 - Sass replaces Less; some class name changes that will need updating in templates, etc.
<http://v4-alpha.getbootstrap.com/migration/>
- Anything else planned?
- Meeting timings again?
 - Could we and should we try and find alternative times for these meetings occasionally so they're not *a/ways* in the middle of the night in Asia and during working hours in the Americas?

Second hour, longer topics

- Planning Tiki15 release

Recording
