Volunteering Facilitator: [Bernard Sfez](#) / Tiki Specialist

1.2. Asynchronous Discussions - Forum Topic Status

- we discussed adding a field (or using a current field?), where the topic creator can mark the topic as: 'Solved', 'Unresolved', 'Partially Resolved', etc. Maybe the default should be 'New'? If the topic creator is responsible for this, than it will be mostly sustainable without anyone having to do any extra work. Otherwise, we can create a cron job to List Execute to change all 'New' answers to 'Unresolved' if no response over 30 days. Opinions?
- it was also suggested to add a 'Resolved' to the title of the topic, like in brackets. While this sounds good, who would do this? While this may not be much work, I suspect it is more than anyone has time to do, and the first option above is simpler and faster to implement
 - can we add a search filter to the 'Topic' column
- I created a 'PluginSlider' (but swiper may be better) that we could put on the top of the 'Forums' to 'humanize' them a bit, or encourage community building:

Chat log

Marc Laporte (marclaporte):I can add a quick topic: Machine Learning

Guest: Alisa:Hi. Thank you. Ma question is: How can I adjust the URLs of the single wiki pages and of the homepage of wiki?

Bernard Sfez / Tiki Specialist (Bsfez):Hello

Gary Cunningham-Lee (chibaguy):Hi Alisa. Do you mean as described on <http://doc.tiki.org/Search-Engine-Friendly-URL> ?

Gary Cunningham-Lee (chibaguy):(to shorten the URLs)

Mike Finko (mikeua):flat, tabs, configured - the three options

Roberto Kirschbaum (robertokir):Bernard sounding a little choppy

Marc Laporte (marclaporte):audio is choppy

Jean-Marc Libs (Jyhem):Bernard sounds very choppy

Guest: Alisa:My URL for the homepage is: <https://www.filterzentrale.com/tiki/> I would like it to be like this: <https://www.filterzentrale.com/wiki/>

Bernard Sfez / Tiki Specialist (Bsfez):Seems I have very bad connection...

Jean-Marc Libs (Jyhem):/me just added Alisa's question to <https://tiki.org/Roundtable-Meeting-2020-08>

Xavi (as xavidp - admin) (xavidp):Alisa, you just need to rename the folder by means of ftp or equivalent (or your file manager in your control panel in your webhost)

Bernard Sfez / Tiki Specialist (Bsfez):Can't see or hear... I'll try something else

Guest: Alisa:thank you

Mike Finko (mikeua):the video on the Tiki Dev site was very informative https://dev.tiki.org/Rubix%20ML#Machine_Learning_vs_Artificial_Intelligence

Jean-Marc Libs (Jyhem):Alisa, it seems your Tiki website is installed in a folder named "tiki". This folder should be renamed as "wiki"

Mike Finko (mikeua):RubixML - which versions of php will it run on?

Jean-Marc Libs (Jyhem):will we update it using composer?

Jean-Marc Libs (Jyhem):Where will the datasets live? Trackers or also files in a folder or as an attachment

Jean-Marc Libs (Jyhem):?

Xavi (as xavidp - admin) (xavidp):Mike: RubixML requirements: 7.2 or above

Mike Finko (mikeua):thanks Xavi. 7.2 is reasonable and seems to be commonly used.

Jean-Marc Libs (Jyhem):sure

Roberto Kirschbaum (robertokir):It takes practice to learn!

Gary Cunningham-Lee (chibaguy):Another task for machine learning ;-)

Gary Cunningham-Lee (chibaguy):Analyze the commits and identify/describe new features.

Marc Laporte (marclaporte): <http://doc.tiki.org/Two-factor-authentication>

Mike Finko (mikeua):for

Gary Cunningham-Lee (chibaguy):For Windows, <https://screen-to-gif.en.softonic.com/> .

Mike Finko (mikeua):for 'screencasts' I use 'Simple Screen Recorder'

Mike Finko (mikeua): <http://www.maartenbaert.be/simplescreenrecorder/>

lindon:thank you Mike

Xavi (as xavidp - admin) (xavidp):Jean Marc: https://seeds4c.org/Ubuntu+18.04+LTS+for+Human+Beans#Screencasting_in_gif

Mike Finko (mikeua):Xavi - the site needs an Let's Encrypt SSL ;-)

Xavi (as xavidp - admin) (xavidp):lindon: simplescreenrecoder is awesome (it's the main one I've been using in gnu/linux for years), unfortunately, I'm unsure it does exist or has been ported to Mac (and I'm afraid it's more complex than just a gif animator)

Xavi (as xavidp - admin) (xavidp):mike:  I do have one, the problem is that some images are shown from external urls without https, afaik

Jean-Marc Libs (Jyhem):Thanks Xavi!

Roberto Kirschbaum (robertokir):Thank you Xavi!

Marc Laporte (marclaporte):We have many places:

Marc Laporte (marclaporte):* Forums * Trackers * Wiki * Chat ** IRC ** XMPP

Marc Laporte (marclaporte):* Mailing Lists

Jean-Marc Libs (Jyhem):jitsi also has a very active IRC forum

Jean-Marc Libs (Jyhem):Tis is the topic of IRC:

Jean-Marc Libs (Jyhem):Tiki 21.1 is out! (See <https://tiki.org/news>) Questions? Just ask! We log the channel @ <http://irc.tiki.org> (start the line with [off] to exclude your message from the log). If nobody responds try <https://wikisuite.chat>

Marc Laporte (marclaporte):Tiki Deliberation!

Marc Laporte (marclaporte): <http://doc.tiki.org/Deliberation>

Roberto Kirschbaum (robertokir):Gary

Roberto Kirschbaum (robertokir): <https://dev.tiki.org/Git-Workflow>

Gary Cunningham-Lee (chibaguy):Ok, thanks, Roberto. So that's the most up-to-date page?

Roberto Kirschbaum (robertokir):That's the one Fabio told me was the best one

Roberto Kirschbaum (robertokir):to start at

Gary Cunningham-Lee (chibaguy):Ok, thank you.

Roberto Kirschbaum (robertokir):u welcome

Jean-Marc Libs (Jyhem):A job for RubixML ? 

Marc Laporte (marclaporte): <https://wikisuite.org/item46-Openfire-XMPP-chat-and-video-logs-to-be-searchable-and-accessible-to-Tiki>

Marc Laporte (marclaporte): <https://github.com/igniterealtime/openfire-monitoring-plugin/issues/35>

lindon:Marc - is this the chat that has the anti-csrf problem?

Marc Laporte (marclaporte):@Lindon: not sure what you mean

Mike Finko (mikeua):How to ENGAGE and AUDIENCE (1) Have clear value for them (2) Low friction sign-up (3) Regularly deliver practical content/value (4) Recognize and reward active members (5) Build a real relationship (6) Get feedback + improve. -Jono Bacon (former Canonical Community Director)

lindon:@marclaporte: will reply by forwarding a prior email for context

Jean-Marc Libs (Jyhem):It's OK : we did not believe you 

lindon:@mikeua - do you have a problem with using {sign}?

Mike Finko (mikeua):there is no 'button' for it in my toolbars. I did not find how to add it (I could copy/past the code, but...). I'm not an 'admin'.

lindon:just type in {sign} at the end of what you write - when the page is saved the other data gets added automatically

Mike Finko (mikeua):ok, will try, thanks!

lindon:np

Jean-Marc Libs (Jyhem):But here is the club of people not using Apple! 

Gary Cunningham-Lee (chibaguy):Oops, I'm using an iPhone for my webcam. ;-)

Marc Laporte (marclaporte):What I was talking about before: <https://tiki.org/Where>

Marc Laporte (marclaporte):nice!

Marc Laporte (marclaporte): <http://doc.tiki.org/PluginTogether>

Roberto Kirschbaum (robertokir):Bye bye all!

Gary Cunningham-Lee (chibaguy):Bye Roberto

Gary Cunningham-Lee (chibaguy):Roberto

Jean-Marc Libs (Jyhem):Bye Bye ! See you next month
